

# GRP / Fiberglass Gully Trap System

**DURA GULLY™**

Gully Trap / Pot System

Roadside gully pots are the link between surface runoff and the drainage system, and therefore are to be regarded as relevant component of it. It is a well-established opinion that their main function is to protect downstream drainage, treatment plant as well as receiving waters from excessive sediment loads. A continuous inflow of solids to a device designed in order to trap them, leads unavoidably to gradual silting and eventually to clogging problems. DuraGully is proudly manufactured by Yeung's Fiberglass to service Hong Kong roadwork engineering for over 30 years.

## International Standards:

BS EN ISO 178 : 2010 – Flexural Strength Test

BS EN ISO 14129 : 1998 – Shear Strength Test

BS EN ISO 14130 : 1998 – Apparent Inter-laminar / In-Plane Shear Strength Test

BS EN ISO 604 : 2003 – Compressive Strength Test

BS EN ISO 527-1 : 2012 – Tensile Strength Test

BS 874-2:Section 2-1 : 1996 – Thermal Conductivity Test

BS 2782-10 Method 1001 : 1997 – Barcol Hardness Test

BS EN ISO 1183-1 : 2012 – Determination of Density

BS 2782 – Part 4 – Method 430A : 1983 – Water Absorption Test

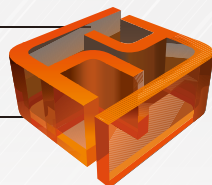

BS 476 Part 6 : 1989– Fire tests on building materials and structures. Method of test for fire propagation for products

BS 476 Part 7 : 1997 – Fire tests on building materials and structures. Method of test to determine the classification of the surface spread of flame of products

ASTM E84-20 – Standard Test Method for Surface Burning Characteristics of Building Materials
